CONTENTS

Preface iii

GENERAL (Invited Papers)

Preliminary planning for the International Hydrologic Decade (1965-74). *J. P. Bruce* 1

Data processing for limnological research. *B. S. V. Cudbird* and *G. K. Rodgers* 6

Great Lakes Regional Data Center. *Lloyd W. Curry* 12

The Great Lakes Study Group. *G. E. Langford* 15

Great Lakes development program—review and prospects. *Gordon E. McCallum* and *Leonard B. Dworsky* 19

Some legal problems affecting the Great Lakes. *Nicholas V. Olds* 32

BIOLOGY AND CHEMISTRY

Chemical characteristics of south-central Lake Huron. *Herbert E. Allen* 45

Sensitivity of fish to environmental alterations. *Walter Chavin* 54

The benthic fauna of Lake Michigan as affected by the St. Joseph River. *Grover W. Cook* and *Ross E. Powers* 68

Yeasts in Lake Michigan and Lake Erie. *L. R. Hedrick, Marjorie Soyugenc, P. DuPont,* and *R. Ambrosini* 77

Significance of bird losses on Lake Michigan during November and December 1963. *Carlton M. Herman* 84

Ecological investigations of the Oswego River drainage basin. I. The Outlet. *Daniel F. Jackson, Nelson L. Nemerow,* and *Myrton C. Rand* 88

Methods and facilities for conducting water quality studies in the Great Lakes. *Roscoe W. Libby* 100

Pollution control in the Metropolitan Toronto region—a case for zoning. *G. Ross Lord* and *Murray G. Johnson* 110

Distribution, environmental requirements and significance of *Cladophora* in the Great Lakes. *John H. Neil* and *Glenn E. Owen* 113

Studies of primary productivity in the Great Lakes. *George W. Saunders* .. 122

Survival of indicator bacteria in receiving waters under various conditions. *Leroy E. Scarce, Sherwin H. Rubenstein,* and *Stephen Megregian* 130

Chlorophyll *a* derivatives in freshwater lakes. (Abs.) *S. R. Brown, Stephen Ferguson, D. C. Hamilton,* and *C. R. Meyer* 140

Detection and measurement of selective organic lampricide residues in natural waters, bottom sediments, and fish tissues. (Abs.) *S. L. Daniels, L. L. Kempe, T. J. Billy,* and *A. M. Beeton* 140

Evidences for the eutrophication of Lake Erie, from phytoplankton records. (Abs.) *Charles C. Davis* 140

Changes in age composition in the smelt *Osmerus mordex* in South Bay, Lake Huron (Abs.) *F. E. J. Fry* 141

A preliminary assessment of some of the factors affecting the water quality of southern Lake Michigan (Abs.) *Charles F. Powers* 141

Photosynthesis and extracellular production in various plankton algae. (Abs.) *C. Sparling* 141

GEOLOGY

A correlation of the currents and sedimentary activity in the Manitou Passage area of Lake Michigan. *William E. French* 142

Theoretical model for the chemical composition of fresh water with application to the Great Lakes. *James R. Kramer* 147

Postglacial chronology and the origin of deep lake basins in Prince Edward County, Ontario. *J. Terasmae* and *E. Mirynech* 161

Trace elements in the sediments of Lake Superior. (Abs.) *David G. Nussmann* 170

METEOROLOGY AND HYDROLOGY

A comparison of methods of current determinations. *Frank R. Bellaire* . . . 171

Seasonal variations of flow and classification of rivers in the Great Lakes-St. Lawrence Basin. *Boris S. Browzin* 179

Hydrology of Lakes Erie and Ontario. *Ivan W. Brunk* 205

Variation of Lake Erie evaporation and its causes. *J. A. Derecki* 217

A facility for air-sea interaction study on Lake Michigan. *Floyd C. Elder* 228

Forecasting Great Lakes levels second through sixth month. *Edmond Megerian* 238

The lake-breeze: a survey of the literature and some applications to the Great Lakes. *R. E. Munn* and *T. L. Richards*. 253

Stage-fall discharge equations for the connecting channels of the Great Lakes. *Frank H. Quinn* 267

An investigation of the extremes of annual and monthly evaporation from Lake Ontario. *T. L. Richards* and *G. K. Rodgers* 283

A survey of Great Lakes snowfall. *Morley K. Thomas* 294

Comparative rainfall study, 68th Street Crib and Chicago area, summer and fall 1963. *George C. Williams* 311

Some wind stress computations from Lake Michigan tower data. (Abs.) *E. Ryznar* and *D. J. Portman* 321

Lake weather phenomena (LWP) Oswego, N.Y. area: a progress report. (Abs.) *R. B. Sykes, Jr.* 321

Daily energy budgets in environmental fluids. (Abs.) *J. Verduin* 321

PHYSICAL STUDIES

Determination of design waves for the Great Lakes. *Arthur Brebner* 322

Turbulence and diffusion in the Great Lakes. *G. T. Csanady* 326

Circulation and thermocline development in a rotating lake model. *Donald R. F. Harleman, Robert M. Bunker,* and *James B. Hall* 340

Drift card studies—Lake Huron. *G. K. Rodgers* 357

Survey of Lake Michigan harbor currents. *James H. Saylor* 362

The periods of the longitudinal surface seiche of Lake Ontario. *R. B. Simpson* and *D. V. Anderson* 369

The detection of rotary currents and internal waves in Lake Michigan. *James L. Verber* 382

Surface currents in Lake Ontario between Oswego and the eastern end of the lake for the period of June, July and August 1963. (Abs.) *J. F. Storr* 390
